EDUCATION

2022 - 2026

FPT UNIVERSITY HO CHI MINH

- Software Engineering
- Semester: 5/9
- GPA: 8.5

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

- C/C++ (1 semester)
- C# (1 semester)
- TypeScript (1 semester)
- JavaScript (2 semesters)
- Java (3 semesters)
- HTML/CSS (3 semesters)

FRAMEWORKS / TECHNOLOGIES

- ReactJS (1 project)
- ASP.NET Core Web API (1 project)
- Tailwind CSS, Bootstrap (1 project)
- Entity Framework Core (2 projects)
- SQL Server (3 projects)

TOOLS

- Git/GitHub (7 repos)
- Jira (1 project)

SOFT SKILLS

- High responsibility in work
- Passionate about acquiring new knowledge and skills.
- Meticulous approach to problem-solving and quality assurance.

HOBBIES

- Passion for solving algorithmic challenges on platforms like LeetCode, Codeforces, and HackerRank to enhance problem-solving and coding skills.

AWARDS

QUACH GIA BAO
BACKEND DEVELOPER INTERN

OBJECTIVE

- **Short-term:** Seeking an internship as a .NET Backend Developer to gain practical experience and apply backend development skills.
- **Long-term:** Aspiring to evolve into a Full-Stack Developer

PROJECTS

SWP Mentor Booking   09/2024 - 11/2024

- **Brief:** A web application developed for SWP391 course that allows students to book mentor sessions based on required skills using wallet points. The system includes features for account management, project group creation, mentor scheduling, feedback, and reporting, optimizing mentor support and improving student learning outcomes. This project serves as a foundation for applying Agile methodology and Scrum model in efficient and flexible software development.
- **Team size:** 4
- **Role:** Full Stack Developer
- **Technologies:** ReactJS, Tailwind CSS, Material UI, Axios, ASP.NET Core Web API, Entity Framework Core, SQL Server, Git/GitHub, Jira
- **GitHub:**
  https://github.com/baoqg9104/Group2_SWP391_SE1867_Frontend
  https://github.com/baoqg9104/Group2_SWP391_SE1867_Backend

Job Finder (Personal project)   11/2024

- **Brief:** An application developed for facilitating job search and recruitment, providing a platform where job seekers can explore opportunities, applicants can create profiles and apply for jobs, recruitment companies can post listings and manage applicants, and administrators can oversee platform operations.
- **Technologies:** C#, WPF, Entity Framework Core, SQL Server
- **GitHub:**
  https://github.com/baoqg9104/Group8_SE1856_GroupProject

Music Player Platform (Personal project)   08/2024

- **Brief:** A simple website to play pre-recorded music, where users can browse and select songs from a library to listen to.
- **Technologies:** React, Typescript, Bootstrap
- **Live demo:** https://baoqg9104.github.io/MusicZ/

300 Code Challenges Clone (Personal project)   02/2024

- **Brief:** A web application developed for practicing coding skills using challenges sourced from LeetCode.
- **Technologies:** HTML, CSS, JavaScript, Bootstrap
- **Live demo:** https://baoqg9104.github.io/300baicodeZ/
